

# 9110 AG-PROBE

## - THE FACTS -

This Ag-Probe is designed for users who already own a potential carrier vehicle. If you don't already have a carrier vehicle, it can be sold as a complete package with a UTV and custom AMS flat bed. The flat bed is equipped with sides that fold down, maximizing storage and sampling needs for year-round soil sampling.

Fitted with a 90 ft/lb. hydraulic hammer, the 9110 Ag-Probe can reach deeper depths in almost any type of soil condition presented, but it is important to note that sampling depths are contingent on present soil conditions. We also offer a variety of tooling options that are compatible with our Ag-Probes for sampling diameters of 1.5 to 3 inches.

Trust the 9110 Ag-Probe for all of your soil analysis needs.
