Equipping the World to Sample the Earth

2026 Mini Catalog

Hay Sampling

Many hay producers, farmers, and researchers seek smaller samples of hay for testing or analysis purposes. One way to obtain a smaller sample of hay is by using a hay core sample tool, which you use to extract a core sample of hay from a bale.

We offer various hay probe samplers for different sizes of bales. Whether you need to assess moisture, protein, or nutrient content, our hay sampling tools provide precise and reliable results. Shop our hay probe samplers today.

Hay & Forage Probes

56864	12" Basic Hay & Forage Probe	\$164.44
57067	24" Basic Hay & Forage Probe	\$175.05
57051	12" Deluxe Hay & Forage Probe	\$328.88
57068	24" Deluxe Hay & Forage Probe	\$344.79

Soil Sampling

If you need to collect soil samples for testing or analysis, you must have the right tools. We offer an extensive selection of high-quality soil sampling tools to ensure accurate and efficient soil sample collection.

When choosing a soil sampling tool, it's important to clearly define your primary objective. Furthermore, take into consideration the specific soil conditions you may encounter and the depths at which samples need to be collected. Explore our wide selection of soil sampling tools today.

Regular Soil Probes

401.022	7/8" X 21" Power-Coated Soil Probe w/ Handle, 5/8" Thread	\$70.32
401.012	7/8" X 33" Powder-Coated Soil Probe w/ Handle, 5/8" Thread	\$87.16

Regular Step Soil Probes

401.40	33" Plated Step Soil Probe w/ Handle, 5/8" Thread	\$128.36
401.422	40" Powder-Coated One-Piece Step Soil Probe	\$105.20
401.42	40" Plated One-Piece Step Soil Probe	\$113.30

Replaceable Tip Soil Probes

425.50	1" X 36" Plated Replaceable Tip Soil Probe w/ Handle, 5/8" Thread	\$175.53
425.52	1" X 36" Plated Replaceable Tip Soil Probe (24" Window) w/ Handle, 5/8" Thread	\$197.23

Open End Soil Probes

401.21	7/8" X 33" Plated Open End Soil Probe w/ Handle, 5/8" Thread	\$153.24
401.211	7/8" X 33" Plated Reinforced Open End Soil Probe w/ Handle, 5/8" Thread	\$176.45
401.10	1-1/8" X 33" Plated Open End Soil Probe w/ Handle, 5/8" Thread	\$192.02
401.101	1-1/8" X 33" Plated Reinforced Open End Soil Probe w/ Handle, 5/8" Thread	\$225.45

Soil Gas Sampling

The gas beneath the soil's surface is an important indicator of potential contamination or the presence of volatile organic compounds (VOCs). It offers insights into subsurface conditions and geological formations. To accurately detect, collect, and analyze this valuable data, it's imperative to use appropriate soil gas sampling tools and equipment. Explore our wide selection of soil gas sampling tools today.

Original Gas Vapor Probe Sampler

427.01	Original Gas Vapor Probe Kit	\$458.38

Sludge & Sediment Sampling

Professionals in industries like construction, mining, or wastewater treatment may find themselves needing to collect samples of sludge and sediment for analysis. It often contains information about the quality of soil composition, water bodies, and potential pollutant levels. To collect accurate and representative samples, you'll need our specialized sludge and sediment sampling tools.

Gouge Augers

64987	1" X 40" Stainless Steel Gouge Auger, Hex Quick Pin	\$360.00
54545	1" X 40" Stainless Steel Gouge Auger, 5/8" Thread	\$355.09

Geotechnical Sampling & Testing

Geotechnical sampling and testing tools are available in various forms, including coring equipment, penetrometers, and testers. Our Pocket Penetrometer is a customer favorite because it provides rapid estimates of unconfined compressive strength of cohesive soils, while our Dual Mass Dynamic Cone Penetrometer Kit delivers an efficient test method for quickly determining in situ California Bearing Ratio (CBR) values of pavement bases, subbase, and subgrade. Browse our extensive selection of geotechnical sampling and testing tools to equip yourself with the precision and efficiency required for your work.

9120-Remote Access Probe (RAP)

The 9120-RAP is a compact, self-contained direct push rig, designed for efficient continuous soil sampling to depths of 20 ft. or more, depending on soil conditions.

9520-Versatile Track (VTR)

The 9520-VTR is a powerful, track-mounted direct push and auger rig that delivers the capabilities required for geotechnical, environmental, exploration, soil gas, and remedial injection applications.

9580-Versatile Track (VTR)

The 9580-VTR is a multi-purpose direct push rig equipped with advanced capabilities, including continuous flight and hollow stem augering, SPT/CPT testing, and high-speed rock coring—making it ideal for a wide range of geotechnical, environmental, and exploration applications.

Ag-Probes

Auto-Field Sampler (AFS)

The AFS is a hydraulically driven soil sampling machine engineered to collect 7/8 in. diameter samples from depths of 0–12 in. in just 5.5 seconds. Universal mounting options are available for ATVs, UTVs, and pickup trucks.

9110 Ag-Probe

The 9110 Ag-Probe is a hydraulically driven soil sampling machine, equipped with a 90 ft.-lb. hammer to collect continuous 1-1/2–3 in. diameter samples from depths of 0–5 ft. Universal mounting options are available for UTVs, tractors, and pickup trucks.

Well Management Systems

PORT-A-REEL

- Ideal for 2 in. or larger wells, up to 280 ft. deep
- Suitable for purging, well development, and sampling
- Portable design for use in tight or hard-to-reach locations
- Available with manual or hydraulic spool operation

3500 Series

- Ideal for 3 in. or larger wells, up to 500 ft. deep
- Suitable for purging, well development, and sampling
- Features a unique AMS design with pump wiring routed inside the hose
- Equipped with handheld pendant control for easy operation

7000 Series

- Ideal for 4 in. or larger wells, at depths of 500 ft. or more
- Suitable for purging, well development, and sampling
- Excellent for groundwater sustainability projects
- Equipped with handheld pendant control for easy operation
